

PRESS RELEASE

30 July 2009

Talvor Announces 50% Production Increase

Australia's leading motorhome manufacturer, Talvor Motorhomes will soon be even bigger with a production increase of 50% announced today. Record breaking sales and increased demand from both retail and rental suppliers have been credited for the increase, according to Talvor CEO Luke Trouchet.

With reports of a general slowdown in the recreational vehicle industry, Mr Trouchet said "Talvor's reputation for building strong, durable award winning motorhomes and campervans has made it the first choice for many people looking for affordable, long lasting vehicles."

In addition to the production increase, Talvor has recently launched two popular new vehicle types, both four berth motorhomes. Mr Trouchet said "Talvor's expanding range of motorhomes can now more than ever, cater to RV enthusiasts from all walks of life."

Talvor's popular electronic bed lift continues to be a key feature in their motorhome floor plans, while a number of new enhancements are available across all vehicle types.

Talvor's company's range of quality campervans and motorhomes is available for retail sale in Australia and New Zealand. The company offers a very popular and successful "try before you buy" option via the Apollo Motorhome Holidays rental fleet.
